(2) Dr. Pagnanore Ambrosini, Director of Education throughout Piedmont expressing his great admiration of the Nature Study as followed in the P.A.S. & his hope of translating some of

the books we use into Italian.

c) The Secondary Schools Association protesting against the proposal of the Board of Education to establish examinations for the Fifth & Sixth Forms to be taken in every Sec. School recognized for Grants.

- (1) To establish in every Secondary School recognised for Grants two new External Examinations of Grades suitable for the Fifth and Sixth Forms respectively, to be taken annually in every School and to be conducted by a University, but the standard to be fixed by the Board of Education and to be substantially equivalent throughout the country.
- (2) To reserve the right of prohibiting every such Secondary School from preparing pupils for other External Examinations except with the special permission of the Board of Education.

The Board of Education are no doubt aware of the difficulty and the undesirability of establishing a new system of Examinations affecting Secondary Schools without the cordial co-operation of those who manage and control those Schools. But assuming that the Board's scheme were so altered as to give the Local Education Authorities an adequate share in shaping and controlling the proposed Examinations, there would remain the difficulty underlying any scheme for the establishment of a single standard for all Secondary Schools, and as the scheme stands, a substantially equivalent standard is to be applied to all Grant-aided Secondary Schools, irrespective of differences of aim, of locality, of the ages and character of the pupils. It follows that any such standard must be a low one, as it would be manifestly inequitable to expect pupils in a young Municipal Secondary School, who leave at a comparatively early age, to reach a standard which would be suitable in a long-established School with an organisation that has stood the test of time, and where the pupils continue their education to the age of 18 or 19. But the combination of a low standard with a wide choice would inevitably lead to the choice of easy subjects—"Soft Options"—and the neglect of more difficult ones. It is feared, therefore, that any common standard would thus lead to a levelling down and not to a levelling up of school work.

c) Miss Parlington delegate from the Modern Language Assn. enclosing a very nice report of our Annual Conference.

d) 7 letters of enquiry following Miss Mason's article in the Modern Magazine.

It was considered ^{impossible} to make any plans for
